

COLINES®

Your first and original
All-in-one...
beware of imitations!

INDICATIVE FOOTPRINT*

z	Height (z) 10,3 m
y	Width (y) 7,4 m
x	Length (x) 6 m

* based on 1500 mm line

The revolutionary system for producing stretch film with the lowest cost/benefit ratio of the investment.

what does integrated solution mean?

- Extrusion
- Slitting
- Winding

why an integrated solution?

- Money saving
- Time and space saving
- Productivity increasing

ALLrollEX®

COLINES®

Main technical data/features:

The ALLrollIEX® line offers the widest range of possible stretch film productions: Hand, Machine and Jumbo.

Hand-machine-jumbo

The development of high output stretch film lines by COLINES® goes on keeping the maximum performances/price ratio and the lowest energy consumption on the market.

In particular, the new ALLrollIEX® line represents the beginning of a new generation of modular lines that can satisfy the requirements of all customers, since they offer web widths ranging from the well-known 1000 mm (with more than 50 lines sold all over the world) to the smart-in-design 4500 mm. A particular emphasis was put on the winding quality of very thin films (down to 6 µm): according to the latest market trends, this is without any doubt the future challenge that COLINES® is ready to take on and win.

Production range

on 2" or 3" cores/format and subformat productions

1000 mm	450 mm	150 mm
750 mm	300 mm	125 mm
500 mm	250 mm	100 mm

Machinery range

Width version 1000/2000/3000/4000/4500 mm

Net output up to 3150 kg/h

New modular machine configuration
